- Other Chronic Non-Healing Wounds

Millions of patients unnecessarily suffer with non-healing advanced wounds, when there is simply no need to. We offer individualized treatments plans based off of the cause of the wound, age of the wound, state of the wound, and the patient's ability to care for the wound at home. We have a variety of advanced therapies to help with hard-to-heal and chronic wounds not reacting to conservative treatment, including, *but not limited to*, hyperbaric oxygen therapy.

For more information or to schedule an appointment, please call **(309) 649-6867**. Self-referrals are accepted, meaning: you do not need a physician's order for your wound to be assessed and treated.
